Free Wifi

Access code is available at reception. Your login and usage can be monitored and restricted when necessary. This service is provided to meet general needs such as checking emails, surfing the web and having access to social media. It is not intended to provide high volume data downloads such as the use of media streaming services. Our wireless network has a certain transmission capacity and should be shared equally for the benefit of all our guests.

Hot Water

Our hot water comes from a central heating system that has some distance to travel to your room. In the winter time the hot water in the pipes cools down quickly which increases heating time. Due to this it may take some time for the hot water to arrive in your room, around 3.5 minutes. We ask that you be patient and let the water flow until it gets hot.

Air Conditioning

The air-cons are all modern split system units i.e. an outdoor unit cools or heats the air and the indoor unit distributes it. Please give the outdoor unit a few minutes to kick in so that it can do its job. Make sure you have selected the right mode on the remote (examples below) for heating and cooling. Please turn off the air-con when you leave your room for long periods of time. Our house keeping staff are also advised to turn off units in your absence.
